

Specifications

Technical

Electrical

- Charging power: Single phase up to 7.4kW/32A; Three phase up to 22kW/32A
- Number of phases: 1 or 3 (fully dynamic)
- Voltage: Single phase: 230V±10%; Three phase: 400V±10%
- Connector type: IEC 62196 type 2 socket or socket with shutter
- Grid frequency: 50Hz
- Power grid: TN, IT, TT
- Meter: Built-in energy meter (±1 %)
- Load management: Up to 30 chargers on the same circuit when using Elecq Link
- Automatic adjustment of charging speed based on available current (Elecq Power Monitor required)
- Automatic charging with solar generation (Elecq Power Monitor required)

Connectivity

- WIFI 2.4GHz&5GHz, 802.11b/g/n/a/ac/ax
- Bluetooth
- Elecq Link (Wi-Sun Sub-GHz)
- RFID/NFC reader
- OCPP 1.6J and OCPP 2.0.1
- Cat4 LTE 4G with standard SIM card or built-in eSIM(optional)
- Ethernet
- RS485

Interaction

- Elecq App
- LED Light strip showing the status of the charger
- Sound effects and voice prompt

General

- Dimension: 283×191×154mm
- Weight: 2.7kg
- Operating temperature: -40~55°C
- Storage temperature: -40~85°C
- Operating altitude: 2000m

Safety

Protection

- Integrated overload protection according to EN IEC 61851-1:2019
- Built-in RCD for ground fault protection (30 mA AC/ 6 mA DC) according to IEC 62955
- Insulation class: I
- Overvoltage category III
- Degree of protection: IP65
- Impact resistance: IK10
- Temperature sensors in all main contacts and critical components

Theft protection

- Anti-theft detection
- The charging cable can be locked permanently in the charger
- Padlock bracket for theft protection

Compliance

- IEC/EN 61851-1
- IEC/EN 61851-21-2
- IEC/EN 62955
- IEC 62196
- EN 301 908-1
- EN 301 908-13
- EN 300 328
- EN 300 330

Elecq Home is intelligent and adapts to all electric vehicles, power voltages and mains. It offers smart charging to cut additional infrastructure and electricity costs.

Installer-friendly design reduces installation time and expenses. It features high reliability and safety designs, making it the top choice for home charging.

Charge More with Less

Elecq Home

Impressively smart.
Impossibly easy.

Benefits

- Elecq Power Monitor avoids expensive investment in smart meter
- Dynamic Load Balance (DLB), Active Load Management (ALM), cloud and locally
- Support up to 30 units with Elecq Link network in a single circuit
- V2H, V2G ready (Comply with ISO 15118-20)(optional)
- All-in-one smart app for home energy management
- WIFI connection
- Internal 30mA AC and 6mA DC leakage detection
- Integrated earth fault protection
- Integrated RFID reader (NFC/ISO 14443 and MIFARE Classic®)
- Energy measurement (+/- 1 %), for reading charge consumption
- Elecq Link avoids unnecessary investments in wired communication
- Excellent sound effects

22kW
Full of power

-40°C~55°C
High environmental adaptability

30%
Electricity cost saving

Reliable local control
By Bluetooth

Elecq APP
User friendly

Supports up to 22kW high charging power in three-phase.

Reliable performance in extreme temperatures.

Intelligent charging algorithm for cost savings.

Local control and monitoring without internet.

Seamless integration with Apple Siri for easy management.

Why Choose Elecq Home

Bill-saving smart

- Save up to 30% on charging expenses* with our intelligent charging plans tailored to local electricity rates and user habits.
- Optimize charging speed with Elecq Power Monitor, balancing power usage between charging stations and home loads without costly infrastructure upgrades.
- Maximize savings by utilizing free, clean energy sources like solar power, and avoid high grid energy prices with Elecq Power Monitor.

*Calculated and measured by Elecq Labs

Cost-saving to install, scale and setup

- Install in just 10 minutes by one person with Elecq Home's modular snap-in design, secured with a single screw between the Backplate and Cover.
- Easily scale up with Elecq's modular design by pre-installing the Backplate and Elecq Ready for future 'plug-and-play' expansion.
- User-friendly setup through the Elecq App with guided flow and NFC preloaded configurations for a seamless 'plug-and-play' experience.

Safety

- High-precision sensors monitor main contacts and critical components in real-time, with power-off protection for unexpected temperature rises.
- Industry-leading surge protection at 10kV/5kA, exceeding EU standards, for robust defense against electrical hazards.
- The socket is angled at 26 degrees to reduce cable protrusion, protecting it from damage and helping maintain a good connection over time.
- IP65 and IK10 ratings ensure optimal safety for indoor and outdoor installations, withstanding extreme weather conditions and physical impacts.
